Health Information Exchange (HIE)

- HIE pilot completed
- HIE production implementation was scheduled for September 2011
- ONC demanded implementation of NHIN Direct and 300 active users prior to continuing efforts to develop query based exchange
- Implemented in late December 2011
- State-AeHN are actively pursuing attaining the 300 active user goal

Health Information Technology

Systems working together: to reduce health care costs & improve the quality of care

NHIN Direct

- Secure Push Messaging Solution
- Use Cases:
 - referrals,
 - summary of care documents,
 - PHI/clinical data exchange between providers (both in state and out of state),
 - receipt of structured lab results,
 - pharmacy usage,
 - State reporting,
 - and many more

State HIE Connection

- Legislature appropriated funds to begin work on the State connection to the HIE
- Work is expected to begin in July 2012
- Significant work will be done to the Master Client Index (MCI) to implement it as the identity management tool for State systems and enable a cross program view of client services
